## MARK SCHEME for the May/June 2010 question paper

## for the guidance of teachers

## 9700 BIOLOGY

9700/21 Paper 2 (AS Structured Questions), maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

UNIVERSITY of CAMBRIDGE International Examinations

P	Page 2		Mark Scheme: Teachers' version	Syllabus	Paper
			GCE AS/A LEVEL – May/June 2010	9700	21
1 (a	) (i)	<u>glyc</u>	<u>osidic</u> ;		[1]
	(ii)	<u>hydı</u>	rolysis / <u>hydrolytic</u> ;		[1]
	(iii)	acce solv tran: maii (raw expa maii maii maii ston hydi (in v	ume that the answer refers to within the cell unless told ept any two relevant examples, e.g. ent / medium for reactions ; sport medium ; ntaining turgidity / keeping firm / prevents flaccidity / AN / material / reactant for) photosynthesis / photolysis ; ansion / elongation / growth ; ntains, hydrostatic pressure / pressure potential ; ntains water potential (gradient) ; A maintains osmotic gradient / prevents plasmolysis natal opening ; rophilic interactions of membranes ; /acuole) pushes chloroplast to edge of cell ;	N ;	
			R hydrogen bonding unqualified by ref. to membranes		[2 max]
(b	<ul> <li>(b) spherical / ball-shaped / AW ; has a tertiary structure ; ignore quaternary hydrophilic / polar, groups on outside ; <u>water</u> soluble ; ignore 'more than one polypeptide'</li> </ul>				
(c)	) (i)	<u>activ</u>	<u>ve site</u> ; <b>ignore</b> binding / catalytic		[1]
	(ii)	2 3 4 5 6 7 8	(shape of) U / active site, gives <u>specificity</u> ; A ecf from substrate, fits into / binds with, active site / U; A ecf from complementary (shape) / matching shape; A ' <u>lock and key</u> ' / <u>induced fit</u> R 'same shape' further detail of substrate binding to active site; forms, enzyme-substrate / E-S, complex; causes stress in substrate / AW; lowers activation energy / reactions occur at low(er) te not used up in reaction / remain unchanged / reusable high turnover number / catalyse many reactions per up high turnover number / catalyse many reactions per up	from (i) mperatures ;	[4 max]

4 (a) caused by pathogen, transmissible / communicable / contagious / transferable / passed from one person to another ;

A for pathogen – microorganism / any two named types of microbe R parasite unqualified

[1]

 (b) R virus or bacteria once in the answer <u>female</u>, Anopheles (mosquito); takes <u>blood</u> (meal) from an (infected) person, feeds on an (uninfected) person; R 'bite' unless qualified with blood *Plasmodium* / parasite, transmitted in (mosquito's) saliva; *Plasmodium* / parasite, blood transfusion / shared needles / across placenta / at birth;

[2 max]

[4 max]

- (c) max 3 for malaria max 3 if pathogen(s) is virus or bacterium
  - 1 Anopheles / mosquito / vector, survives / breeds / lives, within the tropics / in hot and humid areas ; ora
  - 2 Plasmodium / pathogen / parasite, needs to reproduce within the mosquito (at temperatures above 20°C);
  - 3 eradicated in some countries outside the tropics ;
  - 4 ref. to LEDCs and, poor / non-existent, mosquito control programmes ;
  - 5 mosquitoes resistant to, DDT / insecticides / pesticides ;
  - 6 Plasmodium resistant to, drugs / chloroquine / other named drug ;
  - 7 TB is transmitted, by, droplets / coughing / sneezing ; A in the air
  - 8 no vector / no mosquito / no requirement for hot or humid conditions ;
  - 9 ref. to, HIV infection / lower immunity / immunocompromised ;
- (d) 1 <u>active immunity</u>;
  - 2 vaccine contains, antigen(s) / pathogen / microorganism / named type ;
  - 3 (primary) immune response ;
  - 4 B lymphocytes / B cells / plasma cells, synthesise / produce / secrete / release, antibodies;
  - 5 ref. to T helper cells (enhancing humoral response);
  - 6 clonal selection / described ;
  - 7 specific, (T / B) lymphocytes / antibodies ; A 'particular' / AW
  - 8 memory cells, remain (in circulation) / give long-term immunity / give immunological memory / AW ;
  - 9 fast(er) <u>second(ary)</u> response ;
  - 10 ref. to boosters / AW ;
  - 11 immunised person cannot spread disease to others ;
  - 12 herd immunity / unimmunised people are safe(r);
  - 13 surveillance of population for signs of disease / when there is an outbreak ;
  - 14 ref. to ring immunity / AW ;

[5 max]
