## **CAMBRIDGE INTERNATIONAL EXAMINATIONS**

Cambridge International Advanced Subsidiary and Advanced Level

## MARK SCHEME for the May/June 2015 series

## 9700 BIOLOGY

9700/34

Paper 3 (Advanced Practical Skills 2), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2015 series for most Cambridge IGCSE<sup>®</sup>, Cambridge International A and AS Level components and some Cambridge O Level components.

Page 2	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – May/June 2015	9700	34

Mark scheme abbreviations:

; separates marking points

I alternative answers for the same point

R reject

A accept (for answers correctly cued by the question, or by extra guidance)

**AW** alternative wording (where responses vary more than usual)

<u>underline</u> actual word given must be used by candidate (grammatical variants accepted)

max indicates the maximum number of marks that can be given

**ora** or reverse argument

**mp** marking point (with relevant number)

ecf error carried forward

I ignore

		Cambridge International AS/A Level – May/June 2015	9700	34			
(a) lev	el of	risk) medium or high ;		[1]			
(b) (i)	(lal	(labels under correct sequence of beakers) 0.03 + 0.003 + 0.0003 + %;					
	sho	shows transfer of 1 cm <sup>3</sup> of solution from previous beaker to 2 beakers;					
	ado	adds 9 cm <sup>3</sup> water/ <b>W</b> to three beakers ;					
(ii)	1	table with heading + percentage concentration of X;					
	2	2 table with heading + <u>number or no. of bubbles</u> ;					
	3	records results for <b>W or</b> 0% and 4 concentrations;					
	4	records lowest concentration of ${\bf X}$ with a higher number of bubble concentration of ${\bf X}$ ;	oles than hi	ghest			
	5	repeats at least one concentration;		[5]			
(iii)	wh	whole seconds recorded and shows 2 divided by this value;					
	cor	correct answer calculated to correct number of significant figures;					
(iv)	ide	idea of inhibits activity ;					
	idea of preventing substrate binding to the enzyme/active site or fewer enzyme-substrate complexes formed;						
(v)	(co	ounting bubbles) different sizes <b>or</b> too fast <b>or</b> bubbles group toge	ther ;				
	(dis	splacement of water) gas escapes from delivery tube <b>or</b> not all b syringe <b>or</b> parallax error ;	ubbles go ir	nto [2]			
(vi)	(ind	dependent variable) use the same concentration of <b>X</b> ;					
	5 o	or more temperatures ;

2 (	(a)	(i)	(i) orientation (x-axis) length of neck/cm + (y-axis) thickness of muscle wall in left ventricle/						
			scale (x-axis) 2 cm to 10 labelled each 2 cm + must have 50 at the origin + (y-axis) 2cm to 5 labelled each 2 cm, + must have 20 at origin;						
			plotting correct plotting of 5 points;						
			line						
			5 plots with retain 1 m	quality smooth	line less [4]				
		(ii)	correct estim	nate from candidate graph;		[1]			
	(	(iii)	idea of thicker/stronger/wall or muscle to push blood up longer neck or to push the blood further;						
(	(b)	(i)	1 correct s	selection of vessel <b>Q</b> or <b>T</b> ;					
			2 size at le	east 100 mm + no shading ;					
			3 length of	f drawing is at least twice the size of the narrowest	width ;				
			4 draws at	t least three lines across wall + inner line crinkled;					
			5 proportio	ons of vessel walls correct with one selected;		[5]			
		(ii)	) 1 shows on Fig. 2.1 where measured <b>S</b> ;						
			2 shows at least 5 of measurements of the diameter + 5 measurements of the thickness of the wall;						
			3 measure	es at least 3 for each in whole mm or to $\pm 0.5\text{mm}$ ;					
			4 answers	shown as larger number to smaller number to lowe	st common der	ominator ; [4]			
(	(c)	(i)	1 sharp co	ontinuous lines + size at least 40 mm for at least one	e cell ;				
			2 draws or	nly 4 xylem vessels + at least 2 touching ;					
			3 for at lea	ast 2 cells, walls drawn as double lines, with middle	lamella ;				
			4 straight l	line where 2 cells meet <b>or</b> at least one cell with at le	east one angle	present;			
			5 correct la	abel with label line ending in the lumen ;		[5]			
		(ii)	<i>idea that</i> Fig. xylem ha	s more than or	ne layer [1]				
	(	(iii)	i) lumen + space / no (cell) contents or lumen + idea of less resistance;
