MARK SCHEME for the May/June 2008 question paper

0450 BUSINESS STUDIES

0450/02

Paper 2 (Case Study), maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

N.B. This mark scheme includes a summary of appropriate content for answering each question. It should be emphasised, however, that this material is for illustrative purposes and is not intended to provide a definitive guide to acceptable answers. It is quite possible that among the scripts there will be some candidate answers that are not covered directly by the content of this mark scheme. In such cases, professional judgement should be exercised in assessing the merits of the answer and the senior examiners should be consulted if further guidance is required.

Examples of possible answers are also included in this mark scheme. Again, it should be emphasised that this is for illustrative purposes and the examples chosen represent only some of the many possible responses that would merit reward.

N.B. Application marks are not awarded for the name of the business or person from the case material. Application is by answering in the context of the case or by using the information in the case to help answer the question.

- 1 (a) (i) 1 mark for each suitable question.
 Suitable questions might include:
 How much money are you putting in?
 How much is the total investment required?
 How much profit do you expect to make?
 What security against the loan can you offer? [3]

- (ii) Up to 3 marks for each question explained as to why the information is needed by the Bank Manager.
 E.g. 'The Bank Manager wants to know how much money is required to see if the business can pay it back (1) because if it is a large amount of money and the business only makes small sales revenue it will be hard to repay the loan (2). The Bank Manager will also discuss with him if the loan will be large enough to cover all the start up expenses of the business and nothing has been forgotten otherwise there might not be enough money in the business to get started properly (3).' [9]

- (b) Content:
 It would help Abdul estimate how many sales each business would need to make to cover all the costs.
 He can compare the break-even point with the predicted sales for each business.
 Help to estimate how much profit each business might make.
 Help him to estimate how long it would take for the business to break even after starting up.

	Application	Knowledge and Analysis
Level 2	2 marks Well applied to the case.	5–6 marks Usefulness of break-even analysis explained when choosing between the two businesses – or why break-even analysis may not be reliable.
Level 1	1 mark Limited application to the case.	1–4 marks Knowledge of break-even shown. Elements of break-even analysis listed. How break-even analysis might be used.
