

**UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS**  
International General Certificate of Secondary Education

**MARK SCHEME for the October/November 2008 question paper**

**0610 BIOLOGY**

**0610/05**

Paper 5 (Practical Test), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	<b>IGCSE – October/November 2008</b>	<b>0610</b>	<b>05</b>

<b>Question</b>		<b>Expected Answers</b>	<b>Mark</b>	<b>Additional Guidance</b>
<b>1</b>	<b>(a)</b>	cream/white/beige/milky/cloudy, <b>and</b> , frothy/with bubbles/with foam/AW;	<b>[1]</b>	NOT brown/yellow
	<b>(b)</b>	<b>(i)</b> red colour changes (slowly) to, orange/yellow; time reference with units (min); ref. to change in appearance of yeast;	<b>[2 max]</b>	IGNORE ref. to shaking yeast  e.g. <i>more frothy/less frothy/</i> <i>volume decreases</i>
		<b>(ii)</b> acidic (gas); carbon dioxide; (produced by) respiration of, yeast/cells;	<b>[2 max]</b>	
	<b>(c)</b>	1 <i>measure</i> , 20 cm <sup>3</sup> /volume, of yeast culture; 2 (gas) syringe/inverted gas cylinder; 3 (collect volume of gas for) set period of time; 4 repeat measurements with all conditions maintained;  5 calculate, mean/average; 6 divide measurement by time period; 7 airtight apparatus/stop leakage (of gas)/stop entry (of gas); 8 shake culture (so cells do not settle); 9 AVP;	<b>[5 max]</b>	idea of repeating whole experiment rather than consecutive readings for the same experiment  e.g. temperature controlled water bath problem collecting gas (may dissolve in water/can't measure it if collected by downward delivery)
	<b>(d)</b>	<b>(i)</b> clear outline of yeast cell <b>and</b> drawing more than 4cm; any 2 labels from ... cell wall (two lines)/cell membrane/cytoplasm/nucleus/ nucleolus/vacuole/mitochondrion/granules;;	<b>[3]</b>	ACCEPT non-budding cell  1 mark per label, to a maximum of 2 if chloroplast/chlorophyll included, then only allow 1 label mark

<b>Page 3</b>	<b>Mark Scheme</b>	<b>Syllabus</b>	<b>Paper</b>
	<b>IGCSE – October/November 2008</b>	<b>0610</b>	<b>05</b>

		<b>(ii)</b>	81 mm (+/-1 mm) / 8.1 cm (+/-0.1 cm) ; correct drawing measurement ÷ 81 / 8.1 (× 5000);  correct answer (using candidate's figures);			[3]  [Total: 16]	candidate's measurement should be from an equivalent position to <b>XY</b> units do not need to be shown but the measurements used should be in the same units credit with or without × 5000  answer should be correctly rounded to the nearest whole number, or given to a maximum of 2 decimal places																
<b>2</b>	<b>(a)</b>	<b>(i)</b>	two containers with equal volumes of liquid; egg in water/ <b>W1</b> , resting at the bottom <b>and</b> , egg in salt solution/ <b>W2</b> , suspended in liquid;			[2]	ACCEPT <b>W2</b> as vertical																
		<b>(ii)</b>	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 30%;"></th> <th style="width: 20%; text-align: center;"><b>W1</b></th> <th style="width: 20%; text-align: center;"><b>W2</b></th> <th style="width: 30%;"></th> </tr> </thead> <tbody> <tr> <td><b>size</b> of the egg</td> <td style="text-align: center;">large</td> <td style="text-align: center;">small</td> <td style="text-align: center;">;</td> </tr> <tr> <td><b>position</b> of the egg in liquid</td> <td style="text-align: center;">sinks/on bottom/ not floating</td> <td style="text-align: center;">floating</td> <td style="text-align: center;">;</td> </tr> <tr> <td><b>appearance</b> of the surface <b>membrane</b></td> <td style="text-align: center;">tight/smooth/ not wrinkled/AW</td> <td style="text-align: center;">wrinkled/loose/ AW</td> <td style="text-align: center;">;</td> </tr> </tbody> </table>		<b>W1</b>	<b>W2</b>		<b>size</b> of the egg	large	small	;	<b>position</b> of the egg in liquid	sinks/on bottom/ not floating	floating	;	<b>appearance</b> of the surface <b>membrane</b>	tight/smooth/ not wrinkled/AW	wrinkled/loose/ AW	;			[3]	NOT turgid/hard/flaccid/soft
	<b>W1</b>	<b>W2</b>																					
<b>size</b> of the egg	large	small	;																				
<b>position</b> of the egg in liquid	sinks/on bottom/ not floating	floating	;																				
<b>appearance</b> of the surface <b>membrane</b>	tight/smooth/ not wrinkled/AW	wrinkled/loose/ AW	;																				
		<b>(iii)</b>	<b>W1</b> hard(er)/turgid/AW; <b>W2</b> soft(er)/flaccid/AW;			[2]	ACCEPT ref. to rebound if clearly described a comparative statement (e.g. <b>W1</b> is harder than <b>W2</b> ) will score 2 marks

	IGCSE – October/November 2008	0610	05

	(iv)	<p>1 (egg acts as a) cell; 2 egg membrane is acting as a partially permeable membrane;</p> <p>3 <b>W1</b>/(egg/'cell') in water, gained water; 4 turgid/firm/expands; 5 water surrounding egg, has higher water potential/has fewer solutes/is more dilute, than inside egg;</p> <p>6 <b>W2</b>/(egg/'cell') in salt solution, lost water; 7 flaccid/soft/shrinks; 8 solution surrounding egg, has lower water potential/has more solutes/is more concentrated, than inside egg;</p> <p>9 (water moves) by osmosis;</p>	[5 max]	<p>NOT semi-permeable</p> <p>ACCEPT absorb</p> <p>ACCEPT correct ref water gradient/hypotonic/reverse argument</p> <p>NOT solution takes water NOT plasmolysed ACCEPT correct ref water gradient/hypertonic/reverse argument</p>	
	(b)	(i)	<p>even scaling of axes; all points plotted accurately +/-1 mm; ruled line between points/line of best fit;</p>	[3]	<p>at least ½ of the x-axis should be used</p> <p>if a bar chart is drawn, do not award marking point 3 – but the others can be awarded (if they are correct)</p>
		(ii)	correctly read from candidate's graph, with units;	[1]	accurate to +/- half a square
		(iii)	<p>equilibrium; water entering = water leaving/no <u>net</u> movement of water; equal concentration/same water potential;</p> <p>no, water potential/concentration, gradient ;</p>	[3 max]	<p>ACCEPT isotonic/same conc. of water NOT similar</p>
	(c)	(i)	<p>add, biuret A/biuret 1/sodium hydroxide/potassium hydroxide, <b>and</b>, biuret B/biuret 2/dilute copper sulphate; specified, quantity/volume, of reagent; use of test-tube or beaker;</p>	[2 max]	<p>ACCEPT biuret <u>solution</u></p> <p>ACCEPT drops</p>

	IGCSE – October/November 2008	0610	05

		(ii)		<b>C</b>	<b>D</b>			
			appearance of <b>reagent</b> before testing	blue	blue	;	[2]	
			colour after testing	light, mauve/purple/ lilac/AW	dark, mauve/purple/ lilac/AW	;		
		(iii)	sample <b>D</b> contains <b>more</b> protein/sample <b>C</b> contains <b>less</b> protein;				[1]	[Total: 24]
								IGNORE ref. to albumen/biuret 1 ACCEPT blue v. purple
								ACCEPT <b>D</b> contains protein <b>and C</b> does not NOT <b>D is</b> a protein and <b>C is not</b> statement must be comparative ACCEPT an answer consistent with candidate's stated final colour
