

International General Certificate of Secondary Education

MARK SCHEME for the November 2004 question paper

0680 ENVIRONMENTAL MANAGEMENT

0680/01

Paper 1 (Alternative to Coursework), maximum mark 60

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which Examiners were initially instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published Report on the Examination.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the Report on the Examination.

CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the November 2004 question papers for most IGCSE and GCE Advanced Level syllabuses.

UNIVERSITY of **CAMBRIDGE** International Examinations

Grade thresholds taken for Syllabus 0680 (Environmental Management) in the November 2004 examination.

	maximum	minimum mark required for grade:				
	mark available	А	С	Е	F	
Component 1	60	49	39	28	23	

The threshold (minimum mark) for B is set halfway between those for Grades A and C.

The threshold (minimum mark) for D is set halfway between those for Grades C and E.

The threshold (minimum mark) for G is set as many marks below the F threshold as the E threshold is above it.

Grade A* does not exist at the level of an individual component.

November 2004

INTERNATIONAL GCSE

MARK SCHEME

MAXIMUM MARK: 60

SYLLABUS/COMPONENT: 0680/01

ENVIRONMENTAL MANAGEMENT (Alternative to Coursework)

Page 1		1	Mark Scheme Syllabus		Paper
			ENVIRONMENTAL MANAGEMENT – NOVEMBER 2004	0680	1
1	(a)	(i)	Convergent or destructive; either for the mark.		(1)
		(ii)	Anywhere where the two plates meet.		(1)
		(iii)	Oceanic and continental plate move (towards each othe for one); oceanic plate moves under continental plate; subduction zone causes melting, molten rock rises the the crust,	friction in the	
			any two		(2)
			B Discussion of earthquake		
	(b)	(i)	To help understand how volcanoes work; so that warnings may be given prior to an eruption; therefore saving lives and property		
			any		(2)
		(ii)	Any two of : cannot afford to move/fatalism/fertile soils/ energy/tourist possibilities/ cheap land/new land	geothermal	
			2 x 1		(2)
	(c)		ept any sensible suggestion; one for naming, one for exp ilding/money/tents/emergency aid.	lanation	(2)
				То	otal: 10
2	(a)	(i)	Dam is built across a river; to create a head of water/re taken down through dam to a generating station; water where turbines create the electricity; by turning; ref generator	flowing down	
			any three points		(3)
		(ii)	Because dams are often very large/(therefore) take mu to build; infrastructure to distribute electricity/ service fa expensive; loan interest; material/labour costs; inac	cility also cessible site	;
			rehousing costs; land prep costs; any ONE sensible AVP	e use of rese	rvoir; (2)
	(b)	Mos	t likely answers are clean; renewable; cheap to run/no i	mports need	ed (2)
	(c)	from	e areas of land flooded; people have to move; unsightly; rotting vegetation; loss of habitat; downstream effect d up sediment; collapse of dam <i>with</i> sensible/relevar	s; water 'stea	aling';
		any	three 1 each OR any two plus a development mark for e	ither	(3)
					Total: 10

Page 2	Mark Scheme	Syllabus	Paper
	ENVIRONMENTAL MANAGEMENT – NOVEMBER 2004	0680	1

3	(a)	on th soil t Acce	ners put fertilisers/named fertiliser (nitrates/ pot./phosphate)/ pesticides neir land; rain will take some down into the soil; where it moves through the to rivers. Pept similar points about slurry and runoff to a maximum of three simply ed points.	(3)
	(b)	alga river eutr Anir Anir Foo	ae growth faster; block light; die; bacteria in rivers break down dead ae; uses up large amounts of oxygen to break down pollutants; leaving the short of oxygen; causing damage to fish and other water life; reference to ophication; mal waste; (leading to eutrophication) points mal waste; diseases (e.g. of fish/humans) d chain amplification effect described. Idea that pesticides poisonous th one.	(3)
	(c)		re is a wide variety of points possible here, give full credit for developed ts and examples. e.g:	
		be h Ther infra	er Ganges is sacred to Hindus; so river burial is a regular ritual; and would ard to stop for the large Hindu population of India. The are many other simpler points like developing countries will often lack the structure; alternative ways of disposing of waste; areas around major rivers often densely populated; lack of education; lack of money	(4)
			Total:	10
4	(a)	(i)	temperature inversion	(1)
		(ii)	1000- 1200 metres	(1)
		(iii)	Emissions from factories/power stations/cars are unable to disperse in the atmosphere; prevented from rising further by the increasing temperatures; so the pollution stays where it is; near to the ground; cannot spread sideways because of relief;	(2)
	(b)		Cars; accept ideas like car sharing; public transport; walking/bikes etc; as well as ideas about cleaning up vehicle emissions. Factories; accept physical ideas chimneys or anything to do with legislation ; alternatives to fossil fuels .	
			NOTES: need not mention cars AND factories for full marks, a list is max 3 but continuous prose which really just covers four suggestions could work if judged to be well written and more than mere list.	(4)
	(c)		Answers will likely be about the destruction of the ozone layer; global warming are relevant. Accept ideas which develop the scientific, (chlorine atoms etc./danger of UV) or ones that do not.	(2)
			Total:	10

Page 3		3	Mark Scheme	Syllabus	Paper
			ENVIRONMENTAL MANAGEMENT – NOVEMBER 2004	0680	1
5	(a)	 Accept anything that leads to a logical sequence of events, e.g. burn vegetation harvest crops - abandon garden and move on. burn - rain - (move to) new 			
	(b)		ts rid of unwanted vegetation (weeds)/makes 'space' for pow; ashes help to enrich the soil; no artificial fertiliser ne) (2)
	(c)	(i) Because only small clearings are made in the forest; which can easily re- grow if left for long enough; therefore the environment is sustained.			re-
			any two		(2)
		(ii) Population growth will mean a greater demand for food/land; so people may have to clear larger areas of forest; and return to those areas before			
			they are fully recovered.		(3)
				То	tal: 10
6	(a)	(i)	One mark for each accurately completed bar.		(2)
		(ii)	The number of 60+ will exceed the number of 0-19's; m comparative for the mark.	ust be	(1)
	(b)	A larger proportion will need looking after by a smaller proportion of the population; taxes may have to rise for care for the elderly; ageing workforce may become less flexible and less ready to assimilate new ideas.			e may
		Credit any two sensible suggestions which contain some level of explanation.			on. (4)
		Government controls e.g. China: education of women; greater provision of information about or physical manifestations of birth control etc.			(3)
		Give	e full credit for examples and development.	To	tal: 10
