MARK SCHEME for the October/November 2012 series

0680 ENVIRONMENTAL MANAGEMENT

0680/13

Paper 1, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2012 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

	IGCSE – October/November 2012	0680	13

Mark schemes will use these abbreviations:

- ; separates marking points
- / alternatives
- ® reject
- A accept (for answers correctly cued by the question)
- (I) ignore
- AW alternative wording (where responses vary more than usual)
- AVP additional valid point (where there are a variety of possible additional valid answers)
- <u>underline</u> actual word given must be used by candidate (grammatical variants excepted)
- D, L, T, Q quality of drawing / labelling / table / writing as indicated by mark scheme
- max indicates the maximum number of marks that can be given
- eq equivalent
- ORA or reverse argument
- IDEA OF where candidates are expected to make an argument which expresses a particular idea, but the ways in which they will do this will be many and varied

				IGCSE – October/November 2012	0680	13	
1	(a)	(i)	corre key;	ect plot;; (one mark for accurately placing each line	between the sect	ors) [3]	
		(ii)		er vapour / methane / carbon dioxide / CFC; correct for 1 mark		[1]	
	(b)	(i)	acid	rain;		[1]	
		(ii)		: road / sea / air transport / power stations / industry : power stations / industry;	<i>ι</i> ;	[2]	
		(iii)	publ cycle walk car s insta pow scru deta use insu <i>indu</i>	ting; share; all catalytic converter; <i>er stations:</i> bber / catalyst; il; of alternative energy; lation / eq in home; <i>stry;</i> bber / catalyst;		[3]	
						[Total: 10]	
						[1000.10]	
2	(a)	(i)	nut r copp in ol mair gold in ol	in old rocks; not in all old rocks shown; per d and fold mountains / young rocks; nly in Americas;			
				<i>ore</i> in old rocks; l old rocks;		[4]	
		(ii)	tunn brea flood	kers have to endure high temperatures; el collapse / eq; thing problems / lung diseases; ds; osions;		[3]	
			 -	,		[0]

(b)		advantages: disadvantages:		foreign exchange; increase imports of wanted goods; any relevant impact of this on infrastructure environment via pollution;	e;	
			<u> </u>	visual / noise / air; reference effect on tourism;		[3]
						[Total: 10]
3 (a)	(i)	(i) population:		group of organisms / animals / plants (of s	ame species) livir	ng together; [1]
		habi	itat:	where an organism lives;		[1]
		nich	e:	what an organism does in ecosystem (awa	ard example, e.g.	carnivore eq)[1]
		com	munity:	group of populations in an area;		[1]
	(ii)	spre waxy stora	ry hairs			[3]
(b)	Α	They	y can lea	ad to more efficient use of existing farm land	d:	
	В			d clearance / deforestation made to be pest resistant:		
	с	redu	iced use	of pesticide made to be herbicide tolerant:		
		redu	uced use	e of herbicide / better weed control	4	
	D	loss	of biodiv	ay create 'super weeds' without natural con versity due to competition	trois:	
	Ε		of natur of biodiv	al crop varieties will decrease: versity		
	F	Thei		tion could lead to greater use of herbicides:		
	any 3 for ma			nx 3		[3]
						[Total: 10]
