## Tourism in the Spanish Balearic islands

## Balearic resorts to introduce ‘eco-tax’

### From Giles Tremlett in Madrid

Tourists visiting Majorca and other Spanish holiday islands will soon be ordered to pay a green tax to help pay for the damage they inflict on some of Spain’s most beautiful natural landscapes.

The £10 per head tax will either be levied at airports or added to the hotel bills of the millions of tourists who travel each year to Majorca,

Ibiza, Minorca and Formentera.

The proceeds from the tax, expected to be £90 million a year, will be used to repair the harm done by more than 30 years of intensive tourism in Europe’s busiest holiday spot, according to plans put forward by the islands’ government.

This has been proposed by a coalition of Greens, Socialists and island nationalists who won recent elections in the Islands on a political

platform that pledged to put a halt to further tourism developments.

The issue was popular with native Majorcans, even though they have become Spain’s richest people thanks to tourism. Voters decided they had had enough of drunken package tourists. They were also concerned that a fifth of the island is now in foreign hands.
