## MARK SCHEME for the May/June 2012 question paper

## for the guidance of teachers

## 0625 PHYSICS

0625/61

Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2012 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

Page 2		Mark Scheme: Teachers' version	Syllabus	Paper
		IGCSE – May/June 2012	0625	61
(a)	50–250 g	g (or 0.05–0.25 kg) correct unit required		[1]
(b)			90.0 cm mark	[1] [1]
(c)	c) Rule unlikely to exactly balance/ difficult to balance OR rule could slide on pivot OR mass could slide OR centre of mass of rule not at 50.0 cm mark OR rule not uniform1			
	Do not accept comments about poor/careless technique			
(d)	Repeat readings (wtte) OR a reference to finding exact position of centre of mass of metre rule OR a reference to dealing with centre of mass of rule not being at 50.0 cm mark			
(e)	OR With	in limits of experimental accuracy (wtte)		[1]
				[Total: 6]
(a)	$\theta_{\rm R}$ = 22(°	°C)		[1]
(b)	mm, °C	d values 100, 80, 60, 40, 20, 10		[1] [1]
<b>(c)</b> Tem		ature difference = 3(°C), higher		[1]
(d)	-			[1] [1]
(e)	Relevant Waiting t	t avoidance of parallax explained, in using rule or th time between readings	ermometer	
		steady thermometer reading		
	Allow lan	steady thermometer reading np to cool/warm up and average		[1]
