#### **Location Entry Codes**

www.tiremepapers.com As part of CIE's continual commitment to maintaining best practice in assessment, CIE has begun to use different variants of some question papers for our most popular assessments with extremely large and widespread candidature, The question papers are closely related and the relationships between them have been thoroughly established using our assessment expertise. All versions of the paper give assessment of equal standard.

UNIVERSITY of

International Exa

The content assessed by the examination papers and the type of questions are unchanged.

This change means that for this component there are now two variant Question Papers. Mark Schemes and Principal Examiner's Reports where previously there was only one. For any individual country, it is intended that only one variant is used. This document contains both variants which will give all Centres access to even more past examination material than is usually the case.

The diagram shows the relationship between the Question Papers, Mark Schemes and Principal Examiner's Reports.

#### Mark Scheme **Question Paper Principal Examiner's Report** Introduction Introduction Introduction **First variant Question Paper** First variant Mark Scheme First variant Principal Examiner's Report Second variant Question Paper Second variant Mark Scheme Second variant Principal Examiner's Report

### MARK SCHEME for the October/November 2008 question paper

# 0625 PHYSICS

0625/31

Paper 31 (Extended Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2008 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

	ood						
figures specified otherwise, or if only 1 sig. fig. is appropriate.							
Units It is expected that all final answers will have correct units. Deduct one unit pen each incorrect or missing unit, maximum 1 per question. No unit penalty if missing from final answer but is shown correctly in the working.							
Fractions These are only acceptable where specified.							
Extras Ignore extras in answers if they are irrelevant; if they contradict an otherwise response or are forbidden by mark scheme, use right + wrong = 0	corre						
Ignore Indicates that something which is not correct is disregarded and does not cause plus wrong penalty.	a rig						
Not/NOT Indicates that an incorrect answer is not to be disregarded, but cancels a otherwise correct alternative offered by the candidate i.e. right plus wrong applies.							
Work which has been crossed out, but not replaced, should be marked as if it had not been o out.	rosse
