

#### UNIVERSITY OF CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

## MARK SCHEME for the June 2004 question papers

0652 PHYSICAL SCIENCE					
0652/01	Paper 1 (Multiple Choice), maximum raw mark 40				
0652/02	Paper 2 (Core), maximum raw mark 80				
0652/03	Paper 3 (Extended), maximum raw mark 80				
0652/05	Paper 5 (Practical), maximum raw mark 30				
0652/06	Paper 6 (Alternative to Practical), maximum raw mark 60				

These mark schemes are published as an aid to teachers and students, to indicate the requirements of the examination. They show the basis on which Examiners were initially instructed to award marks. They do not indicate the details of the discussions that took place at an Examiners' meeting before marking began. Any substantial changes to the mark scheme that arose from these discussions will be recorded in the published *Report on the Examination*.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the *Report on the Examination*.

• CIE will not enter into discussion or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the June 2004 question papers for most IGCSE and GCE Advanced Level syllabuses.

UNIVERSITY of CAMBRIDGE International Examinations

	maximum	minimum mark required for grade:				
	mark available	A	С	E	F	
Component 1	40	36	28	21	17	
Component 2	80	-	45	29	24	
Component 3	80	49	31	19	14	
Component 5	30	23	19	16	14	
Component 6	60	51	37	24	18	

Grade thresholds taken for Syllabus 0652 (Physical Science) in the June 2004 examination.

The threshold (minimum mark) for B is set halfway between those for Grades A and C. The threshold (minimum mark) for D is set halfway between those for Grades C and E. The threshold (minimum mark) for G is set as many marks below the F threshold as the E threshold is above it.

Grade A\* does not exist at the level of an individual component.

**PHYSICAL SCIENCE Alternative to Practical** 

F	Page 1		Mark Scheme		Syllabus	Paper	
			PHYSICAL SCIENCE – .	JUNE 2004	0652	6	
1	(a)		2.6 cm, 5.8 cm correctly entered in Fig. 1.2 (no tolerance)			[2]	
	(b)		displacement increases as load increases OWTTE			[1]	
	(c)		repeat experiment (and average)/use a ruler marked in millimetres			[1]	
	(d)	(i)	thicker beam gives smaller displacement OWTTE			[1]	
		(ii)	shorter beam gives smaller displacement OWTTE			[1]	
	(e)		hang object on beam [1] read displacement [1] compare result with data from by plotting a graph of the data				[4]
						Total	[10]
2	(a)		1.8V [1], 150mA 2.4V [1], 250mA (1 marł +/- 0.1V, +/- 10mA	< for both current rea	dings)		[3]
	(b)		2 points correctly plotted [2] line drawn (can be straight or	curved) [1]			[3]
	(c)	(i)	the bulb becomes brighter as	resistance decrease	es		[1]
		(ii)	the filament of the bulb melter	d OWTTE			[1]
	(d)		no, since it is not a straight lir OR	ne/V and I are not pro	oportional		[1]
			yes, graph is a straight line/(they are proportional)				
						Tota	al [9]
3	(a)	(i)	53.4g, 60.0g (must s	ay 60.0), no tolerand	ce [2]		[3]
		(ii)	6.6g (ecf) [1]				
	(b)		blue litmus (U.I) paper turns r	ed in the gas (reject	add indicato	or)	[1]
	(c)	(i)	56.8g (no tolerance)				[1]
		(ii)	3.2g (ecf) (both c	orrect for 1 mark)			
	(d)		evaporate to remove some w leave the solution to cool [1] OR evaporate solution [1] over a boiling water bath [1]	ater [1]			[2]

F	Page 2		Mark Scheme	Syllabus	Paper	
			PHYSICAL SCIENCE – JUNE 2004	0652	6	
	(e)	(i)	62.9g, (no tolerance) [1]			[2]
		(ii)	9.5g (ecf) [1]			
	(f) some copper nitrate left in the solution during crystallisation/wat of crystallisation was lost/copper nitrate decomposed/other suitab answer based on experimental details					[1]
					Total	[10]
4	(a)		gas C: 8s gas D: 3s gas E: 12s. (no tolerance)			[3]
	(b)		gas C because it took the least time to fall OWTT	Ξ		[1]
(c) heavier (denser) gases fall, lighter (less dense) gases ris gases less dense (lighter) than air rise [1] gases more dense (heavier) than air fall [1]						[2]
	(d)		to keep the experiment fair/so that the results are	accurate		[1]
	(e)	(i)	gas A rose more quickly/it has the least density			[1]
		(ii)	test with a lighted spill/burn in air [1] gas explodes (pop!) [1]			[2]
					Total	[10]
5	(a)		box 1 colourless (clear) to cloudy/milky [1] carbon dioxide/carbonate [1] box 2(a) carbon dioxide (suspected)/gas will not s combustion/no oxygen/may be nitrogen [1] box 2(b) carbon dioxide confirmed [1] box 3 turned from green [1] to red [1] box 4 turned yellow/orange (reject orange) [1]	upport		[7]
	(b)		reaction vessel with delivery tube [1] gas collected over water or in a syringe [1] means of measuring gas volume/graduations sho	wn [1]		[3]
					Total	[10]
6	(a)	(i)	use a pipette/dropper/burette			[1]
		(ii)	103 (no tolerance) [1] 147 (ecf) [1]			[2]
	(b)		28mm, 14mm (+/- 1mm)			[2]

Page 3		Mark Scheme	Syllabus	Paper	
		PHYSICAL SCIENCE – JUNE 2004	0652	6	
(c)	(i)	axes labelled and scale correctly shown [1] all points from <b>Fig. 6.3</b> plotted correctly [1] straight line drawn extended to cut horizontal axis	[1]		[3]
	(ii)	from candidates' own graph (approx 147)			[1]
	(iii)	it will sink OWTTE			[1]
(d)		yes/comparison of <b>(a)</b> and <b>(c)(ii)</b> shows that numerically similar to (or greater than) its volume OR no/cup sank before its mass (g) exceeded th (depends on candidate's graph) (mark for explanation)			[1]
