

A-level **ECONOMICS** 7136/3

Paper 3 Economic principles and issues

Specimen 2014

Morning

Time allowed: 2 hours

Materials

For this paper you must have:

a calculator.

Instructions

- Answer all questions.
- Use a black ball-point pen. Do **not** use pencil.
- You will need to refer to the source booklet provided to answer **Section B**.
- Do all rough work in this answer book. Cross through any work you do not want to be marked.
- You must answer the question in the spaces provided. Do not write outside the box around each page or on blank pages.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 80.
- No deductions will be made for wrong answers.

Section A

	Answer all questions in this section			
Only one answer per question is allowed. For each answer completely fill in the lozenge alongside the appropriate answer. CORRECT METHOD WRONG METHODS WRONG METHODS WRONG WETHODS WRONG WETHODS				
0 1	Which one of the following is a true statement about average fixed Average fixed costs A do not change as output changes. B fall as output increases. C include rent and raw materials. D equal total costs minus total variable costs.	costs?		
0 2	Which one of the following is an example of a supply-side policy rademand-side policy? A An increase in the supply of money. B Increased government expenditure on welfare benefits. C An increase in export subsidies. D Increased government expenditure on education and training.	ather than a		

0 3 The table below shows the total utility of an individual's consumption of chocolate bars.

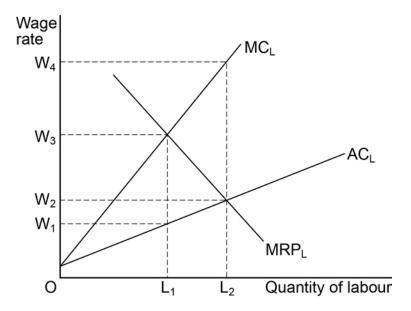

Quantity	Total utility
1	100
2	180
3	250
4	300
5	330

What is the marginal utility gained by the consumption of the fourth chocolate bar?

- A 30
- B 50
- C 70
- D 300

[1 mark]

The diagram below shows the Marginal Revenue Product of Labour (MRPL), Marginal Cost of Labour (MCL) and Average Cost of Labour (ACL) curves in a market where there is a single employer but labour is supplied competitively.

The employer's profit-maximising wage rate and level of employment is a

A wage of W₁ and employment of L₁

B wage of W₂ and employment of L₂

0

C wage of W₃ and employment of L₁

0

D wage of W₄ and employment of L₂

0 5	Over a period of time, the value of the pound against the US dollar \$2.00 to £1 = \$1.50. All other things being equal, this is most likely	
	A UK products becoming more expensive in the US.	0
	B a downturn in the UK's economic cycle.	0
	C a higher inflation rate in the UK.	0
	D an increase in the UK's budget deficit.	0

1 4	Į.	The lack of clearly	defined property rights in a	country is most likely to lead to
-----	----	---------------------	------------------------------	-----------------------------------

A overproduction of merit goods.

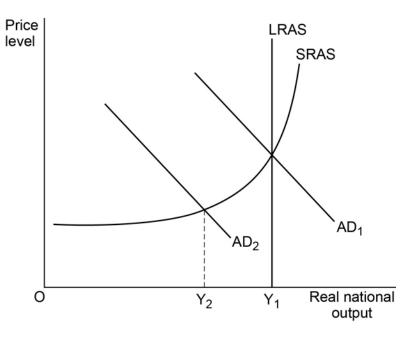

B equality of private costs with social costs.

C overuse of scarce natural resources.

D an efficient allocation of resources.

1 5

The diagram below shows aggregate demand (AD), short-run aggregate supply (SRAS) and long-run aggregate supply (LRAS) curves for the UK economy. Initial aggregate demand is AD_1 . The shift of the aggregate demand curve to AD_2 is the result of a decrease in bank lending following the 2008–2009 financial crisis.

The shift in the AD curve indicates that the effect of the financial crisis on the UK economy was to create a

Δ	negative output of	ran and structural	Lunemployme	nt
$\overline{}$	ricgative output c	jap ana shuctura		/I I L.

B positive output gap and cyclical unemployment.

C positive output gap and structural unemployment.

D negative output gap and cyclical unemployment.

In 2012, the UK Government issued a £100 bond with a coupon of £3 per annum and 40 years until maturity. Two years later, the interest that could be earned on a similar asset had risen to 6%. What is likely to have happened to the price of the bond and its yield?

- A The price of the bond will have risen but the yield will be unchanged.
- 0
- B The price of the bond will have fallen but the yield will have increased.
- C The price of the bond will have risen but the yield will have increased.
- D The price of the bond will be unchanged but the yield will have fallen.

[1 mark]

2 6

The diagram below shows the cost and revenue curves for a firm in a perfectly competitive market.

All other things being equal, the firm

A is making a loss in the short run but will remain in the market in the long run.

0

B is making a profit and will remain in the market in the long run.

C will exit the market immediately to minimise its loss.

D is minimising its loss by staying in the market in the short run.

2	7
_	

The table below contains index number data for an economy's GDP, population size and its price level for the years 2005 and 2014. All three indices have 2005 for their base year.

	GDP	Population	Price level
2005	100	100	100
2014	200	120	150

Using the data, the increase in real GDP per capita between 2005 and 2014 is approximately

Α	10%.	0

B 20%.

C 50%.

D 100%.

[1 mark]

2 8

The data below shows economic growth rates, unemployment rates and inflation rates for an economy.

Year	Real output growth rate (%)	Unemployment rate (%)	Inflation rate (%)
2010	2	4	6
2011	3	3	5
2012	4	3	4
2013	5	2	3

All other things being equal, which one of the following is the most likely explanation for the relationship between the rates of growth of real output, rates of unemployment and inflation between 2010 and 2013?

A A decrease in the money supply.	0
-----------------------------------	---

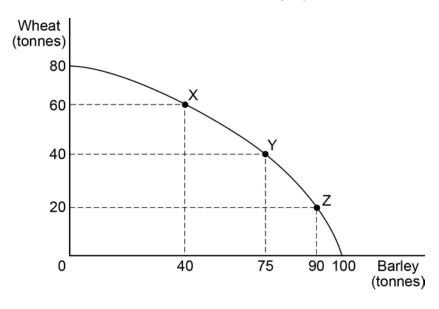

B An increase in innovation and productivity.

C A decrease in the savings ratio.

D An increase in the current account deficit.

2 9

A farmer can produce two types of grain on his farm, wheat and barley. The production possibility boundary below shows the different quantities of the two grains that can be produced on the farm in a single year.

It can be deduced from the diagram that

A a movement from X to Y results in an improvement in productive efficiency because the total output of grain increases from 100 to 115 tonnes.

0

B at point X, the opportunity cost of producing 20 more tonnes of wheat is 40 tonnes of barley.

0

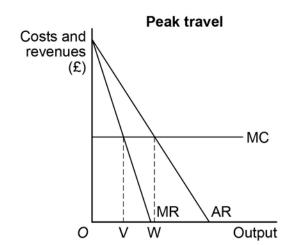

C a movement from point Y to point Z does not involve an opportunity cost because all resources are fully employed.

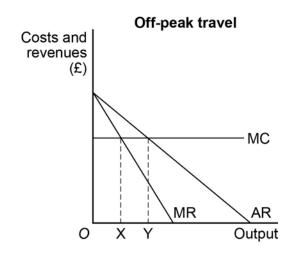

0

D the maximum amount of grain that the farm can produce in one year is 80 tonnes of wheat and 100 tonnes of barley.

3 0

The diagrams below show the peak and off-peak travel markets for a price-discriminating train operating company. The firm is a monopolist and the costs in both markets are the same.

To maximise profits, how much should be supplied in each market?

	Peak travel	Off-peak travel

Brazil: The Hot 'BRIC'

INVESTIGATION

Scenario

You are an economist reporting to a UK car manufacturer who is considering investing in Brazil. The company has requested that you provide answers to three key questions.

Referring to the source booklet, study Extracts **A**, **B**, and **C** and then use these and your own economic knowledge to help you answer questions 31 and 32. There is also an additional news report, **Extract D**, which is to be used with the other extracts to help answer question 33.

3 1	How does Brazil compare with the UK in relation to human capital and mac stability? You must use the data in Extract C to support your assessment.	roeconomic [10 marks]

Extra space		

If your client decides that they want to invest in Brazil, they will have to persuade the government that it will benefit the Brazilian economy and its people.					
3 2	Explain how Brazil is likely to benefit from inward investment by a UK car manufacturer.				
		[15 marks]
