**AS  
GEOGRAPHY**

**7036/1**

**Paper 1 Physical Geography and People and the Environment**

**Tuesday 15 May 2018 Afternoon**

**Time allowed: 1 hour 30 minutes**

**For this paper you must have:**

- the insert (enclosed)
- a pencil
- a rubber
- a ruler.

**You may use a calculator.**

**At the top of the page, write your surname and other names, your centre number, your candidate number and add your signature.**

**[Turn over]**

J U N 1 8 7 0 3 6 1 0 1

**BLANK PAGE**

0 2

## INSTRUCTIONS

- Use black ink or black ball-point pen.
- Answer EITHER Question 1 OR Question 2 OR Question 3 in Section A.
- Answer EITHER Question 4 OR Question 5 in Section B.
- You must answer the questions in the spaces provided. Do NOT write on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

## INFORMATION

- The marks for questions are shown in brackets.
- The total number of marks available for this paper is 80.

**DO NOT TURN OVER UNTIL TOLD TO DO SO**

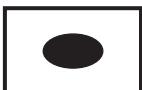

**BLANK PAGE**

0 4

For the multiple-choice questions, completely fill in the circle alongside the appropriate answer.

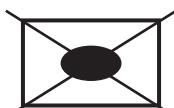

**CORRECT METHOD**

**WRONG METHODS**

If you want to change your answer you must cross out  
your original answer as shown.

If you wish to return to an answer previously crossed out,  
ring the answer you now wish to select as shown.

[Turn over]

**SECTION A**

**Answer ONE question in this section.**

**Answer EITHER Question 1 OR Question 2 OR Question 3.**

**QUESTION 1 – Water and carbon cycles**

**0 | 1 . 1    Which of the following are ALL stores of water in a drainage basin? [1 mark]**

- A Channel flow, infiltration, runoff
- B Evaporation, interception, soil water
- C Ground water, soil water, surface water
- D Precipitation, runoff, soil water

0	1	.	2
---	---	---	---

**Which ONE of the following could be a natural cause of variation in the water cycle? [1 mark]**

**A The rate of transfer of water from lithosphere stores to hydrosphere stores can be increased by urbanisation.**

**B Hydrosphere stores of water can be reduced by abstraction of water for agriculture.**

**C The amount of water stored in the biosphere could be reduced by deforestation.**

**D Storm events transfer significant amounts of water from the atmosphere store to the hydrosphere and lithosphere stores.**

**[Turn over]**

**0 1 . 3**

**Outline an example of positive feedback in the water cycle. [3 marks]**

[End of Question 1]

**QUESTION 2 – Coastal systems and landscapes****0 | 2 . 1****Which of the following are ALL processes of coastal transportation? [1 mark]****A Corrasion, hydraulic action, wave quarrying****B Abrasion, cavitation, attrition****C Mass movement, runoff, sub-aerial weathering****D Solution, suspension, traction****[Turn over]**

**0 | 2 . 2**

**Which of the following describes a Dalmatian coast? [1 mark]**

**A An emergent coastline of former wave-cut platforms and their beaches at a higher level than the current sea level.**

**B A series of ridges on a beach running parallel to the coast marking successively higher tides between neap and spring tides.**

**C A sheltered area on the landward side of a spit where coastal sediments accumulate and become stabilised by vegetation like marram grass.**

**D A submergent coastline where valleys have been flooded by a rise in sea level leaving a series of islands parallel to the coastline.**

0	2	.	3
---	---	---	---

**Outline the concept of eustatic sea level change. [3 marks]**

[End of Question 2]

**QUESTION 3 – Glacial systems and landscapes**

**0 | 3 . 1** What is the geomorphological process of plucking? [1 mark]

- A A process leading to the loss of mass from the glacier mainly due to melting.
- B One of a range of processes by which ice within a glacier is transported downhill from the zone of accumulation to the zone of ablation.
- C Erosion caused by a glacier freezing to the valley floor and sides, removing pieces of bedrock as the glacier moves.
- D Where material carried by a glacier wears away at the valley floor and sides.

[Turn over]

**0 | 3 . 2**

Which of the following describes a till plain? [1 mark]

A A continental size mass of ice that is dome-shaped with flows of ice radiating from the centre.

B A steep-sided ridge of unsorted material stretching across a glacial valley at right angles to the direction of ice advance.

C A swarm of streamlined elongated 'whale back' hills often found on glaciated lowland plains.

D A thick covering of unsorted glacial deposits found behind a terminal moraine.

**0 | 3 . 3**

Outline the concept of the glacial budget. [3 marks]

---

---

---

---

---

---

---

---

---

**FIGURE 5 and FIGURE 6, on pages 6 and 7 of the insert, provide information about changes to the amount of ice in Antarctica and Greenland.**

**0 3 . 4 Analyse the data shown in FIGURE 5 and FIGURE 6. [6 marks]**

**[Turn over]**

**QUESTION 4 – Hazards**

- 0 | 4 . 1** Which of the following best describes an island arc? [1 mark]
- A An archipelago formed of a series of volcanoes rising above sea level associated with an ocean trench and destructive plate margin.
- B An underwater mountain range associated with sea-floor spreading at a constructive plate boundary.
- C A linear lowland area between highlands formed as tectonic processes begin to pull tectonic plates apart.
- D Linear mountain ranges formed as two or more tectonic plates are pushed together often causing layers of sedimentary rocks to buckle and warp.

**0 | 4 . 2**

**Which of the following are ALL hazards resulting from seismic events? [1 mark]**

- A Lava flows, nuées ardentes, shockwaves
- B Liquefaction, landslides, tsunamis
- C Earthquakes, pyroclastic flows, tephra
- D Ash flows, liquefaction, mudflows
