0 3 Read ITEM A below and answer the question that follows.

ITEM A

According to Marx, capitalism is based on the ownership of the means of production by a wealthy minority. Capitalism continues to exist because each new generation of workers is forced to undertake low-paid, alienating work to survive. This makes capitalism potentially unstable, since it depends on the proletariat not seeking to overthrow this unequal system.

Applying material from ITEM A, analyse TWO ways in which the education system might serve the needs of capitalism. [10 marks]

0 4 Read ITEM B below and answer the question that follows.

ITEM B

Social class differences in achievement are found at all stages of the education system and sociologists have put forward several explanations for these differences. Some sociologists focus on factors outside school, such as the material circumstances of pupils' families or the ways in which parents socialise their children. Other sociologists see factors internal to the education system itself as responsible.

However, it can be argued that it is the interaction between these external and internal factors that produces class differences in educational achievement.

METHODS IN CONTEXT

0 5 Read ITEM C below and answer the question that follows.

ITEM C**INVESTIGATING PUPIL EXCLUSIONS**

Pupil exclusions take many forms. Permanent exclusions from school are rare, but about 1 pupil in 20 is excluded for a fixed period, often for physical assaults against staff. There are no reliable figures for pupils sent out of individual lessons. Pupils may also self-exclude by truanting or simply by ‘switching off’ in class.

Boys, pupils with special educational needs, poorer pupils and Gypsy, Roma and Traveller pupils are much more likely to be excluded.

One way of studying pupil exclusions is to use participant observation. By adopting an appropriate role, the researcher may be able to get close to pupils. However, participant observers usually can only study fairly small groups. Furthermore, success greatly depends on the researcher's ability to establish a good relationship with those being studied.

**Applying material from ITEM C and your knowledge of research methods, evaluate the strengths and limitations of using participant observation to investigate pupil exclusions.
